DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 2, 4 and 21-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6, 20, 25 and 35 of U.S. Patent No. 6,627,156. Although the conflicting claims are not identical, they are not patentably distinct from each other. Claims 1-6, 20, 25 and 35 recite an apparatus for piercing container caps that has the following elements: a blade, a means for moving the blade comprised of a support arm, and an alignment block. The blade element of the patented claims has a "generally modified H-shaped cross section". The Examiner believes this meets the limitation of a piercing blade with a zig-zagged section perpendicular to the longitudinal axis since the elements of the "H" would be perpendicular to each other and the main axis. The Examiner, then, believes that

Application/Control Number: 09/780,804

Art Unit: 1743

claims 1-6, 20, 25 and 35 fully encompass claims 1, 2, 4 and 21-24 of the instant application.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1, 3, 4, 21, 22 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Pottorff (6,148,710). Pottorff teaches a slitter and hole punch device. The device is best shown in Figures 1 and 2. These Figures are described in columns 3 and 4. The apparatus includes a slitter and punch unit (20) that has a hole punch element (24). The hole punch element has a jagged edge of cutting teeth (dol. 3, lines 40-41). The punch unit is inserted into an adapter (30) that is attached to the bottom end of shaft (16). The shaft is part of a reciprocating mechanism (15) for punching holes in plastic film. The Examiner believes that (1) the punch element meets applicant's limitation of a piercing blade having a zig-zagged cross section; (2) the shaft (16) is an alignment arm as required by applicant in the instant claims; and (3) the

Art Unit: 1743

adapter (30) comprises an alignment block since is aligns the hole punch element (24) with the shaft (16) and channel (17).

Response to Arguments

5. Applicant's arguments, filed 5/16/2005, with respect to the rejection(s) of claim(s) under "Mater" have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Pottorff.

Allowable Subject Matter

6. Claims 5-10 and 25-30 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Carver (3,791,034), Angst et al. (4,974,457) and Buscher et al. (4,306,356) teach hole punching devices.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dwayne K. Handy whose telephone number is (571)-272-1259. The examiner can normally be reached on M-F 8:00-4:30.

Application/Control Number: 09/780,804 Page 5
